# BUILT TO A HIGHER STANDARD

The reputation of Hammer Strength equipment has been built with steel, sweat and dedication.

Hammer Strength is the No. 1 option for elite athletes because it can take the pounding they dish out, and, most importantly, it's designed to provide results.

We are committed to turning steel into world-class strength equipment. We're also committed to world-renowned durability.

That's why Hammer Strength equipment is tested to exceed industry standards, ensuring that it can hold up to years of even the most intense training programs.

# HAMMER STRENGTH®

# HAMMER STRENGTH STARTS WITH HERITAGE

Strength training changed when Gary Jones created Hammer Strength in 1989. With ingenuity, and input from the Cincinnati Bengals, he constructed machines with performance in mind—effective training tools that move the way the body does.

# HAMMER STRENGTH®

“

I LOOKED AT STARTING  
HAMMER STRENGTH AS  
DOING SOMETHING THAT  
I BELIEVED IN. I WAS  
JUST TRYING TO MAKE  
MACHINES BETTER.”

— GARY JONES

# BUILDING CHAMPIONS

Hammer Strength is found in elite athletic facilities around the world, ranging from the training areas of professional sports teams to health clubs that offer performance strength training programs.

# PLATE-LOADED

**HAMMER STRENGTH IS BUILT ON THE PURE PERFORMANCE OF PLATE-LOADED STRENGTH EQUIPMENT**

Independent natural paths of motion were revolutionary nearly three decades ago when Hammer Strength originated.

Plate-loaded equipment still employs these excellent biomechanics to create the ideal training tool for elite athletes and those who want to train like one.

More than 40 machines mean plenty of different ways to move iron against gravity.

## BAR SUPPORTS AND CATCHES

**ID BAR SUPPORTS**  
3/8" bent plate with 3/8" paint guards protect the rack and dampen sound. Using molded urethane covers, the supports have a large 5-1/2" landing zone and a 1-1/2" resting surface to ensure the bar is balanced. A zinc-plated rod allows for smooth adjustments.

**ID HALF RACK BAR CATCHES**  
22" (56 cm) with a 3-sided urethane guard to shield the catch and the bar. Shock absorption pads and vertical displacement brackets prevent rack damage. Pins through the side of the rack for added stability.

**FLEXIBLE BAR CATCHES**  
Reinforced nylon straps disperse impact to the rack and prevent knurling damage to bars. The front and back of the straps can be offset so the bar rolls away if dropped when squatting.

**PREMIUM POWER RACK BAR CATCHES**  
For NX Power Racks. Designed with 2" x 3", 11-gauge tubing with a 1/2" solid steel rod from upright to upright. High-wear charcoal finish with a 3-sided urethane guard that protects all contact areas. Catches lock into place using Utility Band Pegs.

**STANDARD HALF RACK BAR CATCHES\***  
18" (46 cm) long with a 3-sided urethane guard to shield the catch and the bar. The catch locks in place from the face of the rack. Charcoal finish is a durable matte powder coating that includes paint guard tape.
